

## 4 Tips To Bolster Your Regulatory Strategy

The clinical development industry estimates at least **25%** of reported clinical trial events are mischaracterized

WCG's SRR division specializes in performing these reviews and maintains a global network of **650+** therapeutic medical experts as a source of advisors/adjudicators for clients

To avoid a potential unnecessary negative impact to your safety profile, it is critical for program leadership to provide a focused attention to this risk

Retrospective analysis of events with independent Medical Expert Review is a rapid and cost-effective way to assess the risk, and structure a prospective study to correct any variability/inaccuracy
