

**Join
the network
devoted to helping
clinical research
sites grow their
study pipeline**

Clinical research sites are essential to the successful execution of research. Yet, there are few resources dedicated to helping sites improve their operating efficiencies and increase the likelihood of being selected by industry sponsors to participate in their trials.

The WCG Global Research Network™ (GRN) is a community of research sites who are committed to providing their patients with cutting edge research opportunities, while operating at the highest level of clinical research efficiency and compliance. Membership in the GRN communicates your status as a mission-driven, dedicated research site. WCG regularly provides sponsors and CROs with visibility into GRN members' capabilities and clinical research interest, thereby positioning GRN members to augment their industry-sponsored trial pipeline.

Membership in the GRN communicates your status as a mission-driven, dedicated research site. WCG regularly provides sponsors and CROs with visibility into GRN members' capabilities and clinical research interest, thereby positioning GRN members to augment their industry-sponsored trial pipeline.

The WCG GRN helps research sites through a variety of ways:

Benchmarking Insights

Complimentary access to clinical trial performance metrics to benchmark various operational measures, such as contracting, screening, and enrollment, across the clinical trial landscape.

Exposure to Peer Sites and Sponsors

Join your fellow GRN members in webinars, roundtables, and thought leadership events to share best practices, perspectives, and practical information on clinical trials – at no charge to your site. WCG also affords increased visibility to sponsors and CROs to encourage knowledge exchange and promote GRN members as recognized industry partners.

Connections

WCG regularly provides sponsors and CROs with visibility to GRN members' capabilities and clinical research interest – thus allowing WCG to better position GRN members to participate in industry-sponsored trials.

Resources

CenterWatch is a trusted source and global destination for clinical trials information for both professionals and patients. As a member of the WCG GRN, you are entitled to free subscriptions to [CenterWatch Monthly](#), [CenterWatch Weekly](#), and the award-winning, [Research Practitioner](#).

Membership in the WCG GRN affords sites with the ability to measure their strength, sustain their portfolio and perform research with direct solutions to overcome inefficiencies and delays.
