How We've Helped - EAs and Chart Review

PHASE III ONCOLOGY DRUG - US AND EUROPE

Challenge

Create an effective strategy for sites in the US and Europe, **considering high sensitivity with Oncology sites and patients** to identify and recruit patients **with very strict I/E criteria** for existing chemotherapy patients having either solid tumor or hematologic malignancies.

Solution

Implemented our **ThreeWire Chart Review™** and **Enrollment Assistant™** services at selected sites in Europe and the US, along with a **study website and support materials for 45 countries**.

Results

Reviewed a total of 3,871 charts, with 1,095 passing pre-screening.
Contributed a total of **102 enrollments** across 14 sites. **The highest enrolling site was one which utilized our Enrollment Assistant service.**

"We are so grateful for ThreeWire. You have an outstanding team in terms of professionalism and customer service that separates you from the rest and you should be very proud."
