

Evaluating and Rate Site Training Systems Across Essential Categories Using a Landscape Analysis

Selecting a site training system is a daunting decision that will affect your clinical trials for many years. But it doesn't have to be that way. Many products offer the same or similar features, and it can be confusing to sort out what's essential to your decision-making process and what's not. This checklist can help.

With this comparison checklist, you can:

- Prioritize 18 key site training features based on your company's needs
- Learn about the essential productivity features your site training platform must offer
- Minimize risk in ways that satisfy your business decisions, implementation, and utilization of a platform
- Determine how your top choices stack up against one another.
