

WCG Avoca Quality Consortium

Elevating clinical trial quality, driving efficiency, and mitigating risk through industry collaboration

Gain an unbiased perspective, and have access to tools, templates, and leading practices needed to conduct clinical trials, while ensuring proactive quality management and inspection readiness

Through participation in the WCG Avoca Quality Consortium (AQC), Member pharma, biotech, niche clinical service providers, and CRO organizations collaborate in a progressive, pre-competitive environment with the shared objective of elevating quality and bringing key stakeholders in the clinical trials process into greater alignment.

Members stay current on the latest challenges in the industry and have the tools they need to move forward with confidence in the in the execution of their clinical trials.

Member Benefits

Drive efficiency with 500+ leading tools and templates

Save resources with access to regulatory compliant leading practice tools and templates that you can use within your organization to be inspection ready.

Gain knowledge through collaboration with 150+ industry leading companies

Collaborate with industry leading experts and peers in clinical development on best practices to work more efficiently and effectively.

Stay in compliance

Ensure confidence in the execution of your clinical trials with the utilization of leading practices that are kept current with the changing global regulatory environment.

Increase visibility

Showcase your commitment and approach to driving quality in your organization among industry leaders, competitors, potential partners, and investors.

The AQC Knowledge Center

Access 500+ leading practice tools and templates that can be customized for your organization to ensure the processes yield the appropriate documentation necessary for inspection readiness. Each item in the Knowledge Center is developed based on a rigorous research and review process by Avoca Subject Matter Experts (SMEs).

Close learning gaps through education

Through a range of virtual and in-person collaboration opportunities, Members can close the learning gaps on a team level in important areas that are aligned with quality and risk management in clinical trial execution. The AQC supports situational competency across all levels of our Members' organization through the following vehicles:

- Member-only Online Community, *Aha!*
- Executive Forums & Member meetings
- Leadership Advisory Boards (LABs)
- Educational Webinars
