

What if you had more opportunities for new clinical trials?

Expand your reach and your resources with WCG Independent Site Network Services, as we bring you exciting opportunities for clinical research studies. First, gain exposure to industry-leading sponsors and CROs. Then, with no out-of-pocket costs, you receive study leads that match your therapeutic expertise and availability. You get fast access to hundreds of trials each year to outmaneuver and outpace your competition.

What if you could grow and increase efficiency without hiring more staff? Growing a clinical research operation requires resources. We partner with you to create a more efficient, cost-effective business model through our suite of Managed Research Solutions. By leveraging our expert support to outsource business development and study identification, you gain peace of mind, knowing that a team of professionals “has your back” and understands the business aspects of running a clinical trial. Your team focuses on what matters the most – the patients.

WCG Independent Site Network Services include:

- Exposure to new sponsors/CROs
- Easy CDA and agreement (no long-term/exclusive agreement)
- Individual outreach to determine potential study matches
- Resource to help manage timelines with feasibility, budgets, contracts and regulatory submission
- Patient recruitment and study advertising support to increase enrollment 39%
- An individual accounting manager to handle all site payments.

Savvy WCG Independent Site Network clients are optimizing growth and performance with:

- More trials in your area of expertise
- Less time spent finding studies and added time to focus on patient care
- Easy expansion into new therapeutic areas
- Extended reach and added resources for a competitive edge.

WCG has been a trusted partner in advancing clinical trial success for over 50 years. Our dedicated team and subject matter experts offer deep experience plus fresh insights to revolutionize clinical trials.

- Gain access to 550 new studies per year. Increase patient enrollment by 39% -
