

What Could You Accomplish with a Flexible & Scalable Team of Qualified Research Professionals?

Nine out of ten healthcare executives agree that strong clinical research programs can create a progressive reputation and attract new patients. Financially, 92% say a robust research program is advantageous. However, 67% say limited staff/resources is a challenge.¹

When your site is committed to providing superior patient care but faces resource constraints, WCG Research Professionals Augmentation can boost your bandwidth. Sites today are facing a record number of employee resignations and increasing protocol complexities. Under your supervision, our onsite or remote research professionals perform tasks tailored to meet your needs.

Almost all healthcare executives (93%) say that clinical trials increase care options for patients. Other factors demonstrating the value of clinical research are patient access to cutting-edge therapies (84%) and differentiation from the competition (80%).¹

WCG clients are embracing new resource models for flexible, right-sized solutions to address their objectives and the evolving clinical research landscape.

Research WCG Research Professionals Augmentation provide critical services in key areas:

- Site Operational Support
- Recruitment Acceleration and Enrollment
- Data Entry and Query Resolution
- Study Maintenance: Patient Retention and Management
- IRB and Regulatory Support

WCG Research Professionals Augmentation meets today's resource and study needs – while allowing sites to maintain focus on patients and participants:

- Build an adaptable, expert research team, targeting your exact need
- Increase your ability to plan for increasing study complexity
- Meet sponsor needs and internal business goals

Leverage our expertise to bolster your study team bandwidth – positioning your site/program for clinical trial continuity and ongoing patient access.
