

# Chart Review™

It's Time to Jump Start Your  
Study Enrollment

# Are you missing an important opportunity that's right in front of you?

Nearly 80% of patients say they're interested in clinical trials, yet only about 10% participate. Why? Many are simply unaware of the opportunities.

WCG ThreeWire can help.

Many study sites have potential protocol-eligible patients within their site, but lack the time and resources to identify them. That's unfortunate because finding patients from within clinical trial sites is the most time and cost-efficient way to work toward meeting enrollment goals.

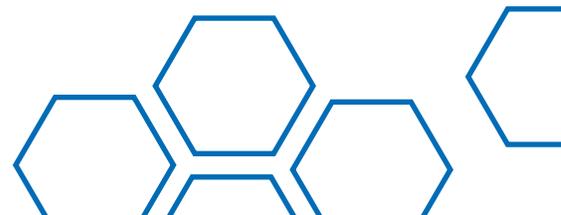

## **This simple lack of site resources can lead to:**

- The need to add more sites and time to your clinical trial process
- The need to recruit patients from outside of participating sites
- Less-efficient and slower recruitment and enrollment
- Missed opportunities for both sites and patients

Here's how it works: Before conducting a WCG ThreeWire Chart Review™, both WCG ThreeWire and the study site enter into a country-specific data privacy agreement that holds WCG ThreeWire to the same standards in protecting patient data as the site itself. Sponsors and sites can move forward with our Chart Review™ process knowing that full legal compliance will be maintained. From there, WCG ThreeWire's qualified professionals review charts from the participating site/practice (as well as referral sites, if applicable), to determine whether patients may be potential candidates for enrollment based on your unique protocol inclusion/exclusion criteria.

## **Enroll more patients in less time – with less effort.**

WCG ThreeWire's Chart Review™ professionals can complete the process faster and more thoroughly than most sites are able because this is their sole, dedicated focus. In short, they help busy study coordinators and site staff focus on other critical, study-related responsibilities.

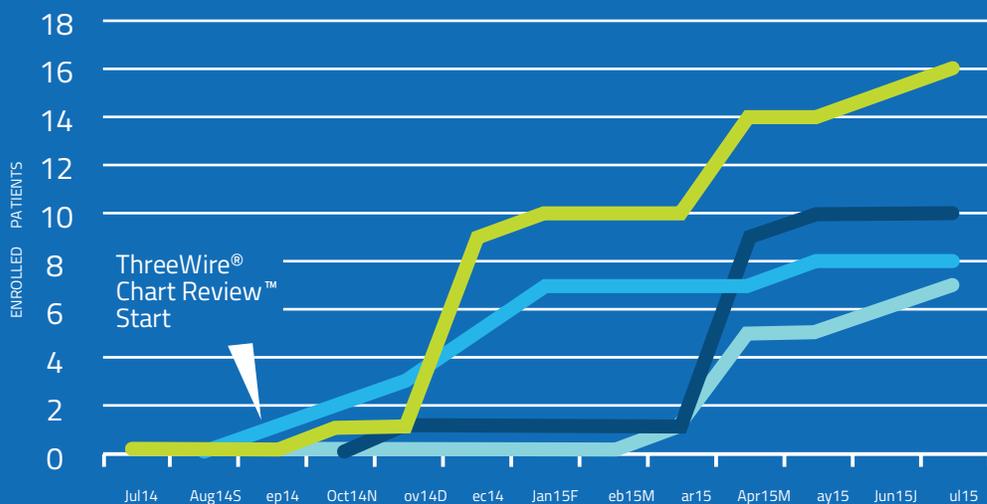

# Is WCG ThreeWire's Chart Review™ right for your sites?

## Our Chart Review™ is perfect for sites that:

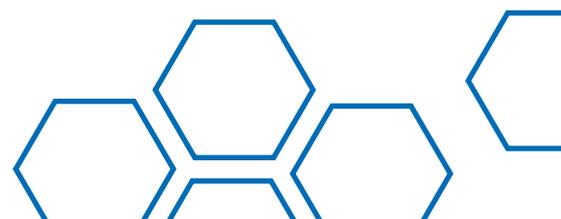

- Have limited staff or resources available to conduct systematic, comprehensive chart reviews.
- Have paper chart systems that are labor-intensive to review.
- Lack the time to review electronic medical records.
- Are inexperienced at conducting chart reviews for clinical trials.
- Simply need more support in their patient recruitment and enrollment processes.

## Impact of WCG ThreeWire Chart Review™ Program at four Global Sites – Enrolled Patients by Month

“ I really appreciated the help and would recommend ThreeWire's Chart Review™ and services to any other coordinator looking to quickly and successfully enroll [patients] in their study.”  
- Study Coordinator

- Czech Republic Site
- Spain Site
- Poland Site 1
- Poland Site 2

# 100% legal and compliant in North America, Latin America, the Middle East and Europe.

We have been conducting WCG ThreeWire Chart Reviews since 2006 for hundreds of large and small sites across the U.S., Canada and Europe. Our global expertise ensures accurate compliance wherever recruiting occurs. We have also expanded our geographic reach to include areas of the Middle East and Latin America.

## Customizable, turnkey services.

There's more to WCG ThreeWire's Chart Review™ process than just reviewing charts. It's a one-of-a-kind, end-to-end system that can include:

- Trained, qualified healthcare professionals at your sites, on a full or part-time basis.
- A systematic process for either electronic or paper charts.
- Outreach to potential study participants.
- Telephone or web pre-screening.
- Tracking of enrollment activities.
- Real-time status of identified candidates through WCG ThreeWire's my-patient.com®.
- Real-world data analytics for your study protocol and patient population.

### **My-Patient.com®. Benefits beyond enrollment.**

Our systematic, technology-based approach – combined with our proprietary recruitment, enrollment and management tool, my-patient.com – allows sites and sponsors to track enrollment by site, strategy and program. It also allows for effective patient tracking, as well as overall program management throughout the study.

Data gathered also provides valuable insight into the patient population, protocol, I/E criteria, disqualifications and more. All of which can be used to enhance:

- Study design (current and/or future).
- Marketing efforts.
- Site selection and validation (current and/or future).

**//** Wow – 10 consents already, that is GREAT news, thank you for sharing! I have to tell you, it is such a pleasure collaborating with you personally and to see “first hand” what an impact WCG ThreeWire services can make on such difficult studies. I can’t even imagine where we would be right now in terms of screening/enrollment if we had not joined forces.”

– Study Project Manager, “Top 10” Pharma Company

# Frequently Asked Questions

## **We already do our own chart reviews. How is this different?**

WCG ThreeWire's Chart Review™ employs an in-depth, systematic chart review process and provides the resources most sites either do not have or cannot commit for study recruitment. The WCG ThreeWire Chart Review™ process has a sole focus: reviewing records and recruiting for your study alone. In addition to using a proven review process, it offers critical follow-up with identified patients and proprietary data management and reporting tools to help your study succeed.

## **Is it legal to let an outside company view our data? Does this comply with patient privacy laws?**

Patient privacy is of foremost concern to WCG ThreeWire. From a legal standpoint, there is no barrier to conducting a WCG ThreeWire Chart Review™ – it's simply a matter of gaining administrative and site permissions.

## **How long does it take to get started?**

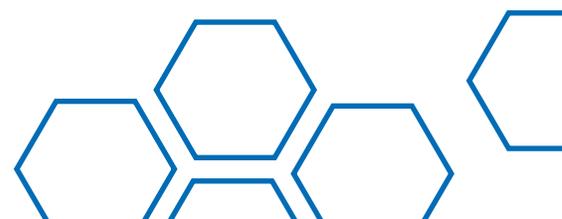

WCG ThreeWire's Chart Review™ can be set up and ready to begin in as little as two weeks. Contact your WCG ThreeWire representative to discuss your specific study requirements and timing. Once WCG ThreeWire's healthcare professional is set up and knows where things are and how to access charts, they can take it from there with a completely turnkey process customized to each site's specific needs, requiring little direction from the site staff.

## **How much time will the trained, qualified Chart Review™ professional spend at the site?**

Based on an initial query of each site's database or patient records, WCG ThreeWire and the site determine together the scope and timeline for completing the actual review. A start date and time will be agreed upon, as well as the number of hours required to complete the process.

## **How much physical space will the WCG ThreeWire professional need at the site?**

Approximately the same amount of space you would provide for a study monitor.

## **If WCG ThreeWire contacts potential candidates, how is information passed on to sites?**

Potential study candidates will be entered into my-patient.com®, WCG ThreeWire's web-based, secure patient tracking database. Sites receive daily email alerts of new pre-qualified patients (referrals) directly from my-patient.com®.

## **Have you worked in academic institutions?**

Yes. WCG ThreeWire has worked with the largest of academic institutions. While it's typical for academic institutions to have additional questions or need more information, we've found time and again that once we provide the information requested, we receive approval to move forward.

## **What if a site does not want to participate?**

Each study site is unique and has the option to participate or not. However, sites utilizing our Chart Review™ services consistently show greater enrollment than their counterparts using traditional recruitment.

## **Should sponsors recommend the service together with WCG ThreeWire?**

To maximize the value of this service for both sponsors and sites, it's essential that the sponsor endorses the service together. This helps the site understand that WCG ThreeWire is collaborating with both the sites and the sponsor to meet study goals and sets the foundation for a positive working relationship between WCG ThreeWire and each site.
