

Reduce Operational Headaches with Integrated CTMS and eISF Workflows

And enjoy a unified vendor experience.

WCG Velos eResearch and Florence eBinders

A partnership built out of key integrated workflows for ultimate optimization of your time and effort.

Accelerate startup with linked intelligent processes.

Reduce friction from manual CTMS document updates.

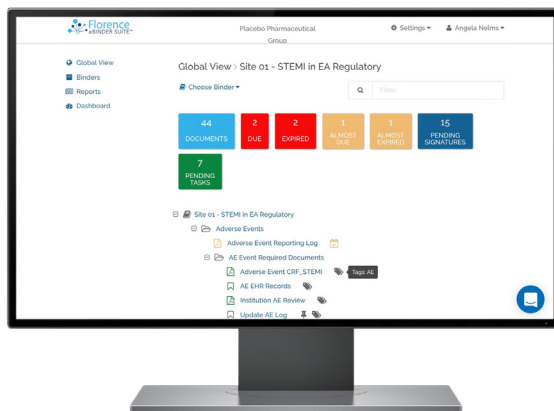

Drive standardization across studies and platforms.

Enable full eISF functionality such as eSignatures.

Reduce compliance risks with a single source of truth.

With Florence and WCG Velos you get an **integrated digital experience and ecosystem** that drives quality and reduces duplication.

The integration between WCG Velos eResearch and Florence **automates study start-up** in Florence eBinders and establishes a one-click single view into version-controlled study documentation without disrupting progress.

Two solutions, one outcome - advancing your research.

Features of the WCG Velos eResearch + Florence eISF Integration

Accelerate startup with linked intelligent processes.

- Create a protocol in WCG Velos eResearch and automate Florence eBinders startup:
 - Creates new study or site binder and folders according to predefined templates and naming conventions
 - Adds and removes users to new studies
 - Assigns appropriate roles to study members
- Empower regulatory team to immediately tackle start-up tasks

Drive standardization across studies and platforms.

- Standardize and repeat study setup structure for future studies and across sites
- Establish and easily maintain improved processes with connected technology
- Enable specific functional teams (e.g. regulatory) to operate as needed without disrupting other processes

Reduce compliance risks with a single source of truth.

- Enable regulatory teams to manage regulatory documents in real-time with less errors and delays
- Easily access document updates and digital audit trails

Reduce friction from manual CTMS document updates.

- See most up-to-date document versions in eBinders directly from links within the CTMS for instant gratification and less clicks

Enable full eISF functionality such as eSignatures.

- Leverage advanced eISF capabilities in eBinders to ensure study operations stay on-track from start-up to close-out

“By integrating Florence Technology with the industry-leading WCG Velos eResearch CTMS, our Unified-Solution provides best-in-class functionality to reduce paperwork and streamline Regulatory Compliance.”
