

Looking for clinical research sites for your vaccine trials? You've come to the right place.

The WCG Site Network partners with sponsors and CROs to identify research sites for Phase I - IV clinical trials in nearly every therapeutic area. We provide sponsors and CROs with access to over 350 research sites, and over 1,100 Principle Investigators to conduct your trials. In addition to identifying research sites for your studies, the WCG Site Network offers a single point of contact throughout the study start-up process, making the feasibility, contract and budget negotiations, and payment reconciliation process much more efficient. Best of all, there is no charge to sponsors and CROs for utilizing our services.

Benefits of Working with the WCG Site Network

Rapid access to hundreds of pre-qualified research sites

Proven **streamlined** and **accelerated** study start-up process

One contract and **one budget** for all sites selected on the trial

Assistance with **site communication** and **study updates**

Single point of contact for feasibility and contract/budget negotiations

Individually assigned **accounting manager** to handle all site payments

WCG Site Network's Impact on Study- Start-up and Enrollment on Recent Vaccine Studies

93%

Reduction in Contract/Budget Negotiation Timelines Compared to Industry Average¹

657

Patients enrolled across 6 WCG Network Sites on an RSV Vaccine Study

92

Patients enrolled across 2 WCG Site Network Sites on a CMV Vaccine Study

217

Patients enrolled across 8 WCG Sites on a meningococcal B vaccine

Sites Available for Your Vaccine Status

100+

Sites in the WCG Site Network that are interested in participating in vaccine trials. We can directly connect you to these sites.
