

Partner with a diverse network of research sites ready to accelerate your vaccine trials.

The WCG Site Network connects sponsors and CROs with a geographically diverse network of high-performing independent research sites and community hospitals, giving you instant access to 470+ site locations and 1,000+ principal investigators ready to conduct your trials in virtually every therapeutic area.

In addition to providing qualified sites for your trials, we offer a single point of contact throughout the study start-up process to help accelerate feasibility, contract, and budget negotiations. But our dedicated site support is what truly sets us apart: our expert team can provide tailored support to Network sites selected for your studies, empowering them to meet and exceed study goals and improve enrollment.

100+ high-performing and experienced sites in the WCG Site Network interested in participating in vaccine trials.

OUR RESULTS AND EXPERIENCE:

27%

faster contracting timelines when working with the WCG Site Network

28%

higher site performance compared to sites outside of the WCG Site Network

29%

faster study start-up timelines when working with the WCG Site Network

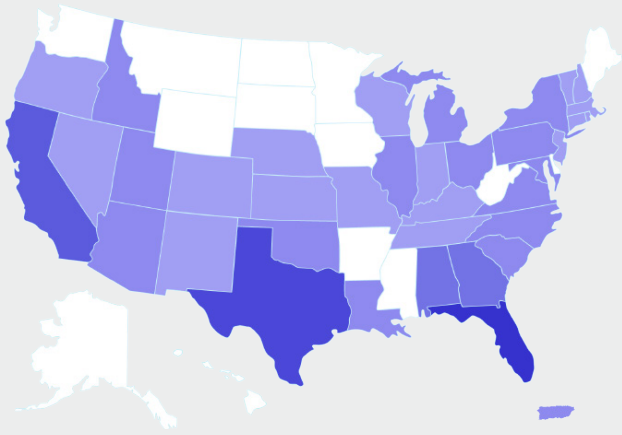

34%

increase in enrollment when working with the WCG Site Network

BENEFITS OF PARTNERING WITH THE WCG SITE NETWORK FOR YOUR VACCINE TRIALS:

-  No additional costs for sponsors or CROs to contract with sites in the WCG Site Network.
-  Single WCG Site Network contact to streamline feasibility, start-up, and site payments.
-  One budget and contract used for all Network sites selected for your studies.
-  Tap into diverse patient populations through our geographically diverse sites.
-  Additional support provided to help Network sites to help meet or exceed study goals and improve enrollment.
-  Bring more diverse potential participants to your study sites through community outreach, referral provider networking, and study advertising.
